**Mansoura, (Available in Cairo) Military**

**Service:** Exemption

## ➤ OBJECTIVE:

Seeking a job in PHP web development. By targeting different types of companies, I try to enhance my experience and knowledge by participating in a team work environment with space to allow for continuous self-motivation and development.

## ➤ EDUCATION:

Bachelor's of Management Information Systems,

**Misr Higher Institute for Commerce & Computers, 2022.**

- **Graduation Project, Using PHP:**

- **Healthy Card:** This is my graduation project. It is a comprehensive system for managing hospitals and medical centers, featuring a QR code for each patient to access all personal information, complete medical records, and medications specific to the patient. Additionally, it includes a remote patient booking feature in a hospital.

## ➤ **PROJECTS:**

### **INVOICES PROJECT USING PHP, LARAVEL:**

It is responsible for collecting debts of banks and sending them invoices.

- URL: <https://github.com/mohamed-nagy255/Invoices-System>

### **WORLD OCEAN, USING PHP, LARAVEL:**

It is an informative website for a tourism company in Saudi Arabia, allowing customers to discover destinations, tourist offers, and communicate with the company.

- URL: <https://github.com/mohamed-nagy255/World-Ocean>

### **AWFAR CART, USING PHP:**

This project is a website for discount cards that facilitate connections between stores. Each card is equipped with a QR code. When the card is used, the specific store code needs to be entered. The control panel allows complete management of the cards, including tracking the number of uses and automatic card expiration without any manual intervention.
